#### 1 Timothy 6:20

O Timothy, keep that which is committed to thy trust, avoiding profane and vain babblings, and oppositions of science falsely so called:

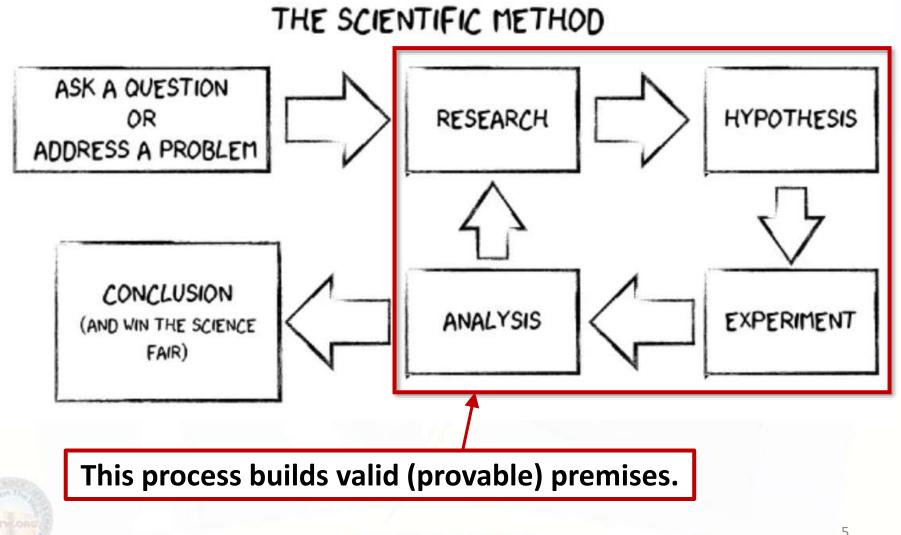

#### Daniel 1:3-4

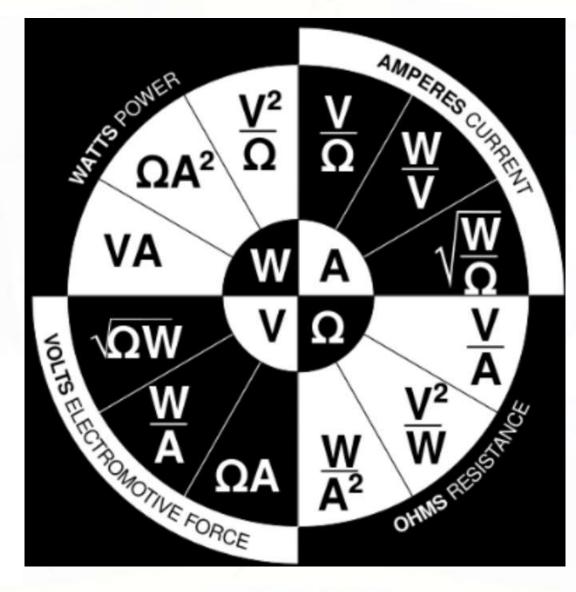

And the king spake unto Ashpenaz the master of his eunuchs, that he should bring certain of the children of Israel, and of the king's seed, and of the princes; Children in whom was no blemish, but well favoured, and skilful in all wisdom, and cunning in knowledge, and understanding science, and such as had ability in them to stand in the king's palace, and whom they might teach the learning and the tongue of the Chaldeans.

#### Science

The systematic study of the structure and behavior of the physical and natural world through observation, experimentation, and the testing of theories against the evidence obtained.

Many think science can provide all we need.

- It puts food on the table.
  - Science made this way easier.
- It gives us the comforts of life.
  - Science has provided more and more comforts such as modern housing, appliances, medicines, automobiles, electronic gadgets, etc.
- It gives hope things will only get better as science discovers more.
  - It hasn't let us down yet, why should it in the future?
- Why do we need God anymore?

#### Scientism

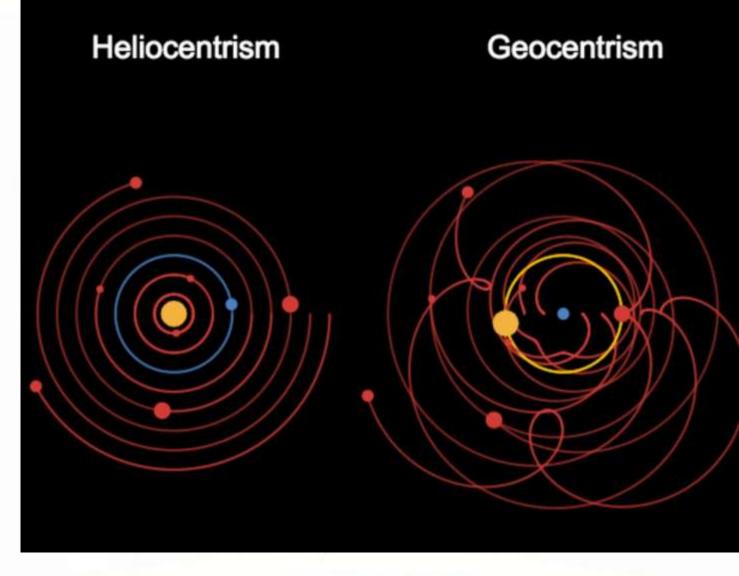

A view about knowledge that holds that only what can be demonstrated scientifically deserves to be considered knowledge.

Anything else, like consciousness, or God, since it can't be 'directly tested', can't be proven.

#### Naturalism

A view about reality that holds that only the material world is real.

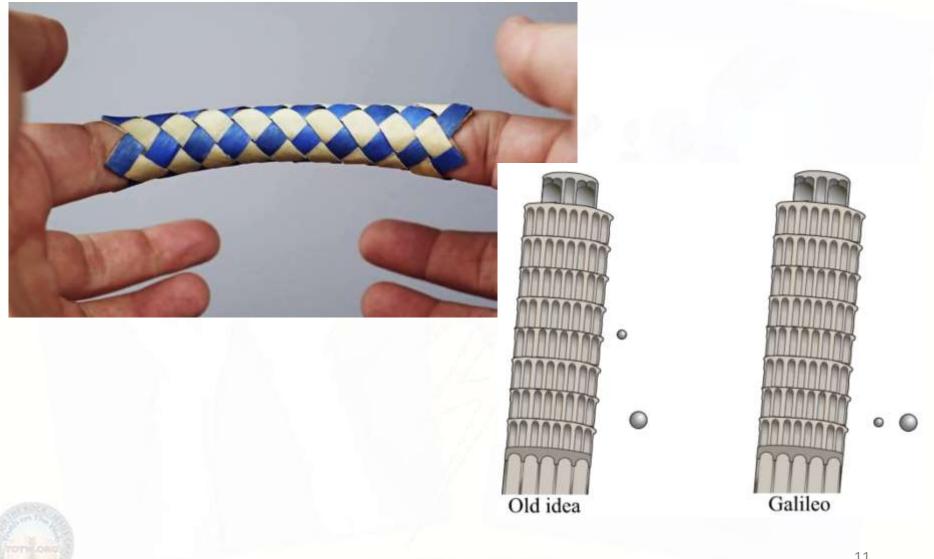

Nothing supernatural exists.

The ultimate condemnation of Galileo began around 1610 and culminated with his trial and condemnation by the Roman Catholic Inquisition in 1633.

Galileo was prosecuted for his support of heliocentrism, the astronomical model in which the Earth and planets revolve around the Sun at the center of the universe.

How scientists use the

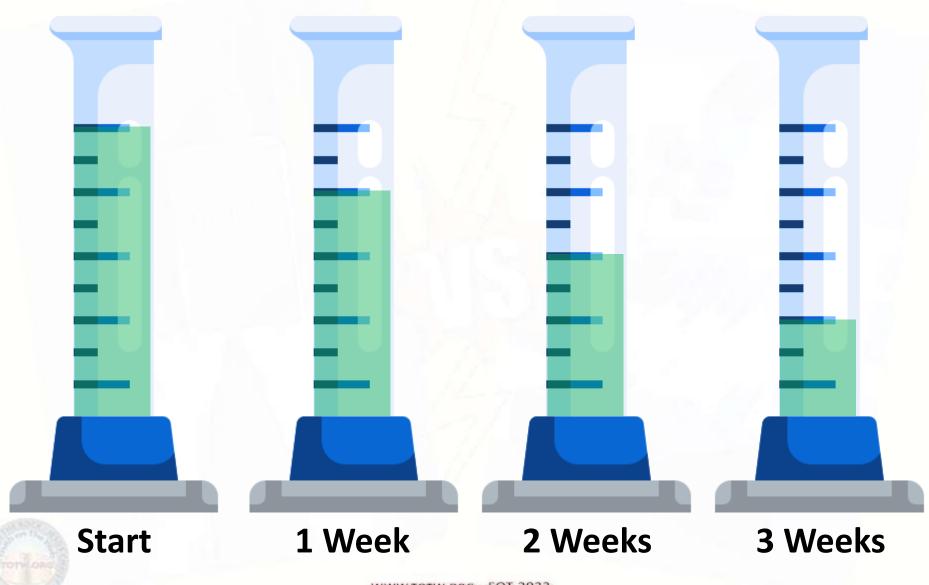

same evidence
